Work History

- | | |
|---|--|
| <p>Autodesk</p> <ul style="list-style-type: none">• Software Development Manager | <p>Vancouver, BC
Jul 2025 - present</p> |
| <ul style="list-style-type: none">– Built and ramped up a full-stack team of 8 engineers, inheriting broad ownership across product licensing, user subscription management, and third-party app integrations– Spearheaded a new recruiting sprint process as the Admin Group EM lead, coordinating 9 job postings under 7 hiring managers, for levels ranging from junior to principal engineer. Following this process for the first time, we achieved a 100% offer acceptance rate and 40% improvement in average time-to-hire compared to the company-wide benchmark for engineering roles | |
| <p>Autodesk</p> <ul style="list-style-type: none">• Principal Software EngineerSenior Software Engineer | <p>San Francisco, CA / London, UK / Tokyo, JP
Apr 2023 - Jul 2025
Nov 2020 - Apr 2023</p> |
| <ul style="list-style-type: none">– As a Senior Engineer (Autodesk Construction Cloud - Project Lifecycle), I made significant full-stack contributions to core ACC features such as Library, Project Home, and Project Templates– As a Principal Engineer (ACC Project Lifecycle), I led and executed on engineering projects through all stages of development: gathering product requirements, tech spec writing, project management, development, QA, and ultimately the customer-facing release– Led a team of 5 engineers in a 6 month initiative to decouple ACC Project Templates from a legacy monolith service, with minimal downtime and 0 significant bugs. Key tasks included standing up the new backend infrastructure; migrating frontend and API consumers to the new system; and coordinating with Devops to carry out the API + database migration in 3 environments (4 data centers).– As the senior-most engineer on the team, I acted as the service owner / security champion for 2 of our 3 core services. Duties included leading monthly service review meetings, building & maintaining real-time monitoring dashboards, and leading cross-functional efforts to resolve and prevent customer incidents– Tools: Python, Flask, Typescript, React, Node.js, Swagger, PostgreSQL, Docker, NewRelic, Datadog, Jenkins, Spinnaker | |
| <p>PlanGrid</p> <ul style="list-style-type: none">• Data Scientist | <p>San Francisco, CA
May 2018 - Nov 2020</p> |
| <ul style="list-style-type: none">– Developed and implemented a framework for analyzing PlanGrid product engagement and user retention, using methods such as A/B testing and ML classification of user personas– Led data engineering projects to overhaul our ETL pipelines, improve error handling / logging, and migrate onto Spinnaker / Jenkins for scalable deployments– After PlanGrid was acquired by Autodesk in December 2018, acted as the temporary manager of the PlanGrid data science team and led efforts to unify 3 acquired companies + 1 legacy org onto a single shared data warehouse– Skills: Snowflake, Amazon Redshift, Python, Spinnaker, Jenkins | |

- **PlanGrid** San Francisco, CA
Nov 2017 - Apr 2018
Business Analyst
 - Maintained hundreds of dashboards, views, and visualizations within Looker to surface data to key stakeholders, including management, the Board of Directors, and worldwide sales employees
